NOTICE OF WITHDRAWAL OF NOTICE OF ENVIRONMENTAL CONDITIONS

WHEREAS, On June 25, 2014, the United States Environmental Protection Agency (EPA) recorded in the Clerk and Recorder's office of the City and County of Denver a Notice of Environmental Conditions, see reception number 2014074071 concerning the real property (referred to as "the Property") located at 3528 Humboldt Street, Denver, CO 80205, and more particularly described as follows:

HYDE PARK ADD BLK 20 PTN L 8 DAF E 61FT E 41.58FT E 22.5FT S 24.21FT W 125.06FT N
25.01FTTO POB

WHEREAS, For purposes of indexing in the County Clerk and Recorder's office Grantor-Grantee index only, EPA shall be considered the Grantor, and Ms. Sarah Ellen Staruch shall be considered the Grantee. Nothing in this Notice shall be construed to create or transfer any right, title or interest in the Property.

WHEREAS, The Property is within the boundaries of Operable Unit 1 of the Vasquez Boulevard and Interstate 70 Superfund Site (Site), as described in the Record of Decision (ROD) signed by United States Environmental Protection Agency (EPA) on September 25, 2003. The ROD established cleanup objectives for lead and arsenic in residential soils to protect human health and prevent unacceptable exposures to adults and children. The levels at which the EPA determined that lead and/or arsenic in soil in residential yards present an unacceptable risk (the so-called "action levels" in the ROD) are 400 parts per million (ppm) or greater for lead and 70 ppm or greater for arsenic.

WHEREAS, After the Notice of Environmental Conditions was filed, the Property owner(s) granted EPA access to the Property for sampling activities. Elevated levels of arsenic were identified. Subsequently, in November 2014, EPA completed remediation of this Property. Residential soils at the Property with arsenic levels above the action levels established in the ROD were excavated and transported off-Site for disposal and clean soils were brought in to replace the excavated soils. Levels of arsenic in residential soils at the Property are now below the action levels EPA established in the ROD.

NOW, THEREFORE, NOTICE is hereby given that the Notice of Environmental Conditions recorded by EPA with the Clerk and Recorder's office of the City and County of Denver on June 25, 2014, reception number 2014074071 is **withdrawn**.

The records regarding sampling and clean up at the Property and other documents relevant to the Property and the Site, generally, may be requested from:
